

SALESLEAD Lite SFA

Your All-in-One Sales and Inventory Management Solution.

Record sales data for each product, customer, and people quickly and easily. Keep track of your stock levels in real time and receive alerts when you're running low on inventory. Get instant insights into your sales performance with detailed reports that can be customized to your needs. Help to increase efficiency of your sales team by removing the time consuming reporting works.

Track your daily Secondary

Major Benefits of Saleslead Lite SFA

Saleslead Lite SFA simplifies manual sales processes by facilitating value-level transactions. It enables you to gather sales data through Sales Representatives (SR) using product codes, providing comprehensive national reports categorized by brands, SKUs, and individuals.

You furnish the initial inventory, and the system takes charge of tracking all incoming and outgoing movements, ensuring you stay informed about stock levels at the distributor level.

Access to national and team reports not only saves the sales team hours of manual work but also allows them to concentrate on the core aspects. Additionally, it offers the capability to deliver mid-day updates, enhancing real-time insights and responsiveness.

Sales entries undergo thorough scrutiny and control through cross-check and approval by the sales manager, ensuring accuracy and proper authorization in the sales process.
